Entry-level Software Applications Development Engineer with strong hands-on experience in Python and Node.js backend development, focused on building, enhancing, and maintaining enterprise-grade applications. Experienced across the full Software Development Life Cycle (SDLC), including requirement analysis, REST API development, debugging, root cause analysis, testing, and documentation. Proficient in SQL databases and Linux/Windows environments, with a strong analytical mindset and ability to collaborate effectively with cross-functional teams.

## TECHNICAL SKILLS

|                 |                                                                         |
|-----------------|-------------------------------------------------------------------------|
| Languages       | Python, JavaScript (Node.js), SQL, Bash                                 |
| Backend         | Node.js, Express.js, Flask, FastAPI, RESTful APIs                       |
| Databases       | PostgreSQL, MySQL, MongoDB                                              |
| Cloud Platforms | AWS (S3, Lambda, KMS, IAM, CloudWatch)                                  |
| DevOps & Tools  | Git, GitHub, Docker, CI/CD (GitHub Actions), Postman                    |
| Other           | Application Development, SDLC, API Design, Authentication (JWT, OAuth2) |

## EXPERIENCE

### GruhNirman Technologies | SDE Intern

March 2025 - April 2025

- Built and deployed an Azure-based chatbot into production, improving system reliability while handling debugging.
- Collaborated across teams following full SDLC phases and delivered clear documentation that improved project tracking and stakeholder communication.

### Bluestock Fintech | SDE Intern

Aug 2024 - Sep 2024

- Engineered high-performance React components (+30% improvement) and robust REST APIs, enhancing system throughput and reliability
- Worked in Agile sprints, contributing to feature delivery, testing, root cause analysis, and service restoration during production issues.

## RESEARCH & PROJECTS [Link](#)

### Intelligent Health Incident Monitoring System | [Link](#)

Developing a **Node.js backend application** to monitor application health, ingest logs, and automatically detect system incidents using RESTful APIs.

Implementing **SQL-based incident tracking** and **error classification**, enabling root cause analysis and improved system reliability.

Applied structured logging, debugging, and **API performance optimisation** following **SDLC. Software**

### Log Analyser & Automated RCA Tool | [Link](#)

Building a **Python-based log analysis** and **automated Root Cause Analysis (RCA) system** to detect error patterns and improve software reliability.

Designing algorithms to **parse logs, classify failures**, and generate **actionable RCA summaries**, simulating real-world production debugging workflows.

### A SecureCloud Vault – Zero Trust Cloud Storage | [Link](#)

Built a **secure, serverless file storage platform** with AWS (S3, KMS, IAM) and Firebase Auth, enabling encrypted file sharing with expiring URLs.

Implemented **RBAC, audit logging, and anomaly detection** with PostgreSQL, DynamoDB and AWS KMS, ensuring enterprise-grade security and compliance.

### Cloud Services Cost Comparison | [Link](#)

Designed and documented a platform that applies **clustering analysis** to compare AWS, Azure, and GCP pricing for CPU, RAM, and storage, enabling **data-driven cloud provider selection**.

Building a scalable, case-study-driven framework to help businesses optimise cloud costs and make **evidence-based infrastructure** decisions.

## VOLUNTEER EXPERIENCE

### Google Developers Groups (GDG@Nashik)

Member

A Helping Hands Platform for technical as well as non-technical students, professionals at a city level

Nov 2022 - Present

## EDUCATION

### MET Bhujbal Institute of Engineering

Dec 2021 – May 2025

B.E. in Information Technology

## CERTIFICATIONS

- API Fundamentals Student Expert** – Postman Student Program and Lets Upgrade
- DevOps Fundamentals** – Udemy
