Summary

Frontend-focused Full Stack Engineer with 4+ years of experience building and delivering enterprise-scale applications using **Angular, .NET Core Web API, SQL, and Azure Kubernetes Service (AKS)**. Skilled in developing **modular, high-performance frontends** and **secure, scalable backend APIs** with cloud-native deployment pipelines. Proven ability to design, optimize, and maintain **modern web architectures** that enhance reliability, performance, and user experience in global product environments.

Skills

Frontend: Angular, React, JavaScript, TypeScript, HTML, CSS, Bootstrap, Material UI, Redux, Responsive Design, Performance Optimization

Backend Web APIs: .NET Core Web API, C#, Entity Framework, TypeORM, REST API, Authentication & Authorization, NodeJs (Exposure)

Databases: MySQL, SQL Server, MongoDB, SharePoint

DevOps: Microsoft Azure, Azure Functions, App Services, CI/CD Pipelines, Azure Kubernetes Service (AKS), App Insights, Docker

Collaboration & Tools: Git, Azure DevOps, Agile/Scrum, Co-pilot, Postman

Experience

Schlumberger (SLB)

Pune, India

Front End Developer II

10/2023 - Present

Global technology company providing services for the oil and gas industry

- **Led a team of 3 developers**, owning end-to-end **architecture and delivery** of Angular-based enterprise applications.
- Improved UI responsiveness by **~60%**.
- **Developed & integrated REST APIs** using **.NET Core Web API and SQL**; implemented query optimization and caching to enhance performance.
- **Built reusable Angular components** (infinite scroll, filter tables, dynamic search modules) to accelerate feature delivery across product teams.
- **Deployed and managed applications on Azure (App Services, VNets, AKS, App Insights)**; standardized monitoring and reduced mean time to diagnose issues by **50%**.
- **Automated CI/CD pipelines** for 3+ products using **Azure DevOps YAML**, ensuring consistent and secure deployments.
- **Conducted 40+ code reviews** and mentored 4 junior developers, improving frontend quality, maintainability, and collaboration practices.

Full Stack Developer

04/2022 - 10/2023

- Reduced API latency from 6s to ~1.5s by optimizing queries, **indexes**, and refactoring backend services.
- **Designed and delivered Angular 14+ frontends integrated with .NET Core Web APIs and SQL backends.**
- **Implemented RESTful services** with authentication, caching, and stored procedures, improving reliability and reducing API response time by 65%.
- **Collaborated in cross-functional Agile teams**, ensuring code quality through rigorous reviews and test-driven development practices.
- Delivered **Angular** frontends integrated with **.NET Core Web APIs**; aligned REST contracts with pagination, filtering, and sorting for consistent client-server communication.
- Established Azure infra (App Services, VNets, App Insights) and introduced org-wide Application Insights practices.

Associate Full Stack Developer

08/2021 - 04/2022

- Engineered an e-Permit system (**React + TypeScript + Redux**) that reduced manual effort by 92% and achieved 70%+ unit test coverage using **Jest** and **React Testing Library(RTL)**.
- **Delivered Node.js + TypeORM backend** for field operations; standardized REST APIs with pagination, filtering, and sorting for consistency across services.
- Delivered **PowerApps & Power Automate workflows** integrated with SQL/SharePoint, digitizing field-data entry in 6 weeks.

Jubilant FoodWorks

Greater Noida, India

Senior Executive

08/2018 - 02/2020

Leading food service company with a significant presence in India

- Implemented WMS in Asia's largest food warehouse; enhanced tracking across 11 facilities.
- Improved warehouse efficiency by {15%} by building SAP-driven HTML/CSS dashboards for real-time utilization.

Siemens

Mumbai, India

Intern

06/2017 - 12/2017

- Created SAP report for a new conductor; reduced product cost by 54%

Key Achievements

 UI Performance Enhancement Improved UI responsiveness by 60%, boosting performance during enterprise app delivery processes.	 Azure Integration Efficiency Reduced Azure diagnostics time by 50% through standardized monitoring across multiple services.	 Automated Deployment Success Achieved automated CI/CD for over 3 product pipelines, ensuring consistent releases and deployments.
---	--	---

Projects

Synergy	06/2024 - Present
----------------	-------------------

Created a digital platform that efficiently aggregates data and streamlines operations	
- Built a digital operations platform integrating BeyondTrust, ESM, and SimpleHelp for incident management - Developed Angular frontends with NgRx state handling for 100+ complex forms - Integrated Apigee Gateway for API lifecycle management, policy enforcement, and SLA reporting - Setup the routing-based architecture for front end application using Angular - Created responsive UI pages along with multiple reusable components using Angular	

Integrated Solution Advisor - ISA	12/2022 - 12/2024
--	-------------------

Delivered a field-ready PWA and admin web app with Angular 14+ frontends integrated with ASP .NET Core Web API.	
- Delivered a field PWA and admin portal with Angular 14+ frontends integrated with .NET Core Web API. - Built reusable Angular modules (RxJS state mgmt, lazy loading, route-level code-splitting) → improved app responsiveness by ~40%. - Designed & implemented .NET Web API services: entities, migrations, stored procedures, indexed queries; standardized REST contracts with Swagger/OpenAPI. - Developed authentication & authorization with JWT tokens, API Gateway policies, Angular Interceptors, and route guards. - Configured Azure DevOps CI/CD (YAML) with Key Vault integration for build/test/deploy pipelines; deployed apps via Azure App Services. - Set up Azure Application Insights to reduce diagnostic time by 50%.	

START (HR Recruitment App)	01/2022 - 12/2022
-----------------------------------	-------------------

Streamlined internal job creation and vacancy tracking using PowerApps, Power Automate, and SharePoint .	
- Developed an HR recruitment system in PowerApps to manage internal job creation, approvals, and vacancy tracking. - Integrated Power Automate flows to trigger approval emails, update records, and synchronize data with SharePoint lists. - Enabled managers to monitor filled vs. unfilled vacancies across geo units, reducing manual tracking efforts. - Delivered role-based access, dashboards, and automated notifications that improved HR process efficiency by 35%.	

Electronic Permit to Work (ePTW)	04/2021 - 01/2022
---	-------------------

Developed a complete digital system for work permits facilitating operations across various countries	
- Built an e-Permit system (React + Redux) deployed across 12 countries; reduced manual effort by 92%. - Designed & implemented backend services with Node.js + TypeORM for data collection workflows, authentication, and REST integration. - Optimized Node.js APIs with indexed queries & caching, reducing response times significantly. - Automated tests with Jest + RTL, achieving 70%+ unit coverage.	

Education

Centre for Development of Advanced Computing (CDAC)	India
PG-DAC (Advanced Computing)	05/2020 - 05/2020
VJTI (Mumbai University)	Mumbai, India
B.Tech. (Production Engineering)	07/2014 - 07/2018
